EXPERTISE

Backend

C#, .NET / ASP.NET Core, Web API, EF Core, LINQ, Minimal APIs

Architecture

Clean Architecture, Modular Monolith, DDD, CQRS / MediatR, N-Tier, SOLID

Data

PostgreSQL (indexing, query plans), SQL Server, Redis, MongoDB

Quality

Hangfire, Hosted Services, xUnit, Swagger / Postman

Security

JWT, granular RBAC, payment gateways, POS terminals, IAP

Product

React, React Native / Expo, Tailwind, Figma, Docker, GitHub

EDUCATION

University of Tabriz

B.Sc. Computer Engineering
Sep 2024 — Exp. Jun 2028
Data Structures, Algorithms, Databases, Software Engineering, OS

LANGUAGES

Persian — Native

English — Professional working

SUMMARY

Results-driven software engineer in the **C# / .NET** ecosystem, shipping maintainable architectures, high-throughput APIs, and enterprise systems. Proven with **Clean Architecture**, **Modular Monolith**, and **DDD**. Strong on PostgreSQL & SQL Server design, Redis caching, and Hangfire background work — backend-first, with full-stack range in React, React Native, and Figma.

EXPERIENCE

Backend Developer · .NET / C#

Nov 2025 — Present

Mozayedegar Co.

Tabriz, Iran

Karafan

Mozayedegar

Olympiad

- **Karafan** (karafan.iranvtto.ir): led the full server-side system for a nationwide National TVTO platform on .NET Core and Clean Architecture.
- Designed a multi-tiered **RBAC** engine for institutional and coaching permissions; built checkout and appointment services with physical **POS** and bank gateways.
- Tuned PostgreSQL plans/indexes and layered **Redis** to cut latency on heavy reporting endpoints; backed transactions with **xUnit** and functional tests.
- **Tickcar & Ticktruck**: procurement/inspection modules with DDD bounded contexts; offloaded PDFs and schedules to **Hangfire**.
- **Mozayedegar** (mozayedegar.com): REST APIs with CQRS via MediatR, isolating command and query pipelines.
- **Olympiad** (olympiad.iranvtto.ir): worked full-stack, owning both the .NET backend and front-end delivery.

VENTURES

Konkur Plus — konkurplus.com

2025 — Present

Co-Founder & Full-Stack Engineer · EdTech

- Modular monolith in .NET (schema-per-module PostgreSQL, MediatR, JWT) with isolated Identity, Learning, AI, Orders, and Support domains.
- React Native / Expo app: study timers, planners, exam engines, Cafe Bazaar & Myket IAP, plus LLM agents and Redis leaderboards.

MODULAR MONOLITH .NET REACT NATIVE LLM IAP

Golabi — golabi.app

2025 — Present

Co-Founder & Product Designer · RTL desktop product

- Figma design system for contractor finance: projects, units, sales, installments, cheques, counterparties.
- Persian RTL client in React + Vite + Tailwind (shadcn/ui) — dense desktop workspace, not a marketing site.
- Deployed and maintain the app on a Linux server, owning the release pipeline end-to-end.

FIGMA REACT TAILWIND RTL / FA LINUX DEPLOY

Sellura — Inventory & supply chain

2025

Product Designer & Full-Stack Developer

- Multi-tier stock flow from suppliers and drivers through warehouse tracking and retail POS; N-Tier C# / .NET backend for adjustments, audit logs, and P&L.

N-TIER C# .NET REACT
